

## Product Data Sheet

### K2™ BIO STAT

#### DESCRIPTION

- An extremely effective treatment that is intended for use before coating masonry surfaces, roof tiles, etc, which have evidence of biological contamination, eg: fungus, algae, moss and lichens.

#### RECOMMENDED USE

- Quick acting and also provides a strong residual effect which prevents re-growth on treated surfaces.

#### BASIC DATA

- **APPLICATION:** Apply using a low-pressure garden sprayer.  
K2™ Bio Stat must not be added to any sealer or coating.  
Do not use K2™ Bio Stat in or near fishponds or ornamental pools. Avoid spraying on plants.
- **CLEAN UP:** Wash equipment with water - do not dispose of washings or unused K2™ Bio Stat into waterways, etc.

#### SURFACE PREPARATION

- Surfaces to be treated must first be cleaned of dust, dirt and other contaminants - this is best achieved using a high-pressure water jet.

#### INSTRUCTIONS FOR USE

- Thoroughly wet the surface with K2™ Bio Stat and allow drying completely before application of any sealer or other coating.
- **Do not apply if rain is anticipated within 12 hours.**

#### SAFETY

- Avoid contact with skin and eyes.
- Wear rubber gloves, chemical goggles and impervious footwear during use.
- Do not pour left over material down any drains.
- **FIRST AID:** If swallowed, induce vomiting, drink plenty of water and seek immediate medical assistance.  
If in eyes, rinse with lots of water for at least 15 minutes – seek medical assistance.  
If skin contact occurs, wash with warm soapy water – contact a doctor of irritation persists.
